Dear Chairman, Honorable Board Members, Ladies and Gentlemen,

On behalf of myself and of my colleagues, I would like to thank you most sincerely, for our long friendly relationship, and the respect you have always shown us. There are no words that express our appreciation.

I am particularly grateful for this wonderful opportunity to let you know that with care for Africa's assistance and your generous donations, we have successfully continued to implement Tarime Goodwill Foundation's policy, which is also our governments policy, of fighting poverty, diseases and ignorance.

Fighting diseases:

As you all know, preventative medicine is always cheaper than curative medicine. And it is for this reason that Care for Africa has constructed a deep borehole at Surubu village at the cost of USD 24,000. Surubu village is a dry area with a population of about 10,000 people, which most of the time is without clean drinking water. Village people of Surubu are now for the first time in their lives drinking safe and clean water free from any contamination with intestinal parasites. This help, was very much needed and very useful to our people. We shall be very grateful to have many more of such boreholes if possible in areas that have been identified to provide maximum benefit to the local communities.

Fighting Ignorance:

The construction of Tarime Goodwill Foundation Secondary School is the cheapest way of educating more children from poor families and orphans. Care for Africa has been supporting 8 children from poor families and orphans from HIV victims in their secondary education for several years.

Their progress is very encouraging. To make this program sustainable we are building Tarime Goodwill Foundation Secondary School which will be completed at the end of this year. Having this Secondary School will enable more children from poor families and orphaned children to receive education more economically than sending them to other secondary schools.

Fighting poverty:

We at Tarime Goodwill Foundation believe that healthy and educated people can fight poverty more easily.

Request:

International Donor Agencies can help by Donating Computers, Laboratory Equipments, Science Textbooks, part time English teachers to Tarime Goodwill Foundation Secondary School.
