

Care for Children

To enable children with disability to be agents of change and realise their hopes and dreams.

Together we can
make a difference.

Care for
Africa

CARE FOR CHILDREN PROGRAM

Care for Children has been created and formed to facilitate the treatment, management and rehabilitation of children with chronic debilitating physical disabilities, in particular those requiring plastic surgery and orthopaedic conditions.

These children do not have access to medical support without your help they become marginalised in their communities.

The deep-water bores we install in the school grounds enables children with disabilities, who would otherwise not be able to attend school to obtain an education.

Installation of school sanitation toilet blocks with disability access provides water, private room access and hand washing facilities.

WHAT WE HAVE ACHIEVED SO FAR

20 children have received life changing surgery for congenital abnormalities.

We have **23 sponsorship children** who are either vulnerable, at risk, require ongoing medical care or access to education.

We have installed **12 water bores** with disability access bringing clean drinking water to 32,000 people. The Wells increased school attendance from 40% to 68%.

We built **5 hand peddled wheel chairs** for children and adults with disabilities.

Care for Africa unites and works with the communities to empower independence by providing water, health, education and enterprise.

HOW YOU CAN HELP

Visit www.careforafrica.org.au today and make a one-off donation or subscribe to our regular giving program. Every dollar counts.

“A child with a disability needs someone to give them the appropriate assistance so they can fulfill their dreams and shine.”

Diana Butler

OAM CEO and Co-Founder

WHAT ARE THE COSTS

- 20k** Installs and maintains a **deep water bore** with disability access.
- 25k** Sponsors the build of a **school sanitation block** with disability access.
